## **La tradizione al passo coi tempi**

**DAL 1974**

Una collezione di articoli per camini e stufe: il risultato di un'attenta e continua ricerca.

Le fasi di progettazione e realizzazione di ogni singolo pezzo, rifinito a mano con grande cura, determinano e garantiscono la qualità degli articoli e la loro durata nel tempo.

La COMEX production nasce nel 1974 dalla tenace volontà artigiana della famiglia Affò, la prima officina di produzione di accessori in ottone per camini e stufe.

La produzione, affinata nel corso degli anni, comprende ora non solo articoli in ottone, ma anche una vasta gamma di accessori in acciaio inox, metallo verniciato, pelle e vetro. La maestria artigiana viene tramandata gelosamente da allora fino ad oggi, tanto che attualmente vanta una vera e propria "collezione" di oggetti unici per il fuoco creati su misura: alari, portalegna, bracieri...

## **Tradition in keeping with the times**

**SINCE 1974**

*This collection of fireside accessories is the result of continuous research and testing.*

*All the items are designed and developed to guarantee superior quality and long life and are painstakingly finished by hand.*

*COMEX Production was established in 1974 by the Affò family, and was the first workshop in the area to make brass accessories for fireplaces and stoves.*

*The production range was gradually refined over the years and now, in addition to brass items, features an extensive collection of accessories made of stainless steel, painted metal, leather and glass. The founders passed on their know-how and skills and the company today produces its own collection of exclusive custom accessories, including firedogs, log baskets and braziers.*
