

Electric and gas cooking surfaces:

This appliance complies with the eco-design requirements of Regulation (EU) No. 65/2014, which supplements Directive 2010/30/EU, in accordance with EN 60350-2, EN 15181 and EN 50564.

ENERGY SAVING TIPS

Make the most of your hot plate's residual heat by switching off cast iron hot plates 10 minutes before the end of your cooking time and glass ceramic hot plates 5 minutes before the end of cooking time.

The base of your pot or pan should cover the hot plate. If it is smaller, precious energy will be wasted and pots that boil over leave encrusted remains that can be difficult to remove.

Cook your food in closed pots or pans with well-fitting lids and use as little water as possible. Cooking with the lid off will greatly increase energy consumption

Use purely flat pots and pans

If you are cooking something that takes a long time, it's worth using a pressure cooker, which is twice as fast and saves a third of the energy.

Product information complies with Commission Delegated Regulation (EU) No. 66/2014			
	Symbol	Value	Unit
Brand		Kaiser	
Identification of the model		KG 9357 Turbo	
Type of surface cooking		Gas - Inox	
Number of cooking zones and/or areas		5	
Heating technology (induction cooking zones and cooking areas, radiant cooking zones and solid plate)
