Art. 271
BROCCA per acqua

Mr. Baldassare Agnelli. 110 years ago, in northern Italy.

“Hygiene, elegance, practicality, savings...

Baldassare Agnelli is the only factory that can supply a full homogeneous kitchen in pure Aluminum.”

That is what was written in the catalog of our first cookware production.

And Mr. Baldassare, our ancestor, said the truth. It was 1907, more than a century ago.

Vittorio Emanuele III was reigning over Italy, and Theodore Roosevelt was in his second term as President of the United States.

Ever since then, the Agnelli factory has never stopped manufacturing cookware.

Today, safe and secure technology is added to craftsmanship; Agnelli cookware is used all over the world, it meets the most sophisticated cooking techniques and it is appreciated by the most established chefs and lovers of good food.

Baldassare Agnelli

New York show room. Being good Italian ambassadors.

Aluminum, the most prestigious lines of pots but also traditional noble materials (including tin copper); and yet all the efforts to convey our knowledge of the kitchen.

Where could we export our century old testimony of good Italian manufacturing?

New York, New York! It is a long advocated idea that fits perfectly with our vocation.

On the other side of the Atlantic, there is a new address: 126 - 5th Avenue, in the heart of Manhattan, between Union Square and Madison Square Park, few blocks away from EATALY, a symbol of made in Italy flavour, and from the FLATIRON BUILDING, the historical skyscraper designed by D. Burnham and one of the symbols of the city.

Over 120 square meters that tell our story and give room to all our creative impulse.

It is the new Baldassare Agnelli show room that unites taste with elegance, proposed techniques with experience on the field dedicated to professional use and lovers of good food.

Which material should I put on the fire?

Material	Conductivity W / m ² K	Specific weight kg/dm ³
Silver	420	10,5
Copper	392	8,9
Copper 3*	320	8,9 / 2,7 / 7,8
Gold	295	16,7
Aluminum	225	2,7
3-ply*	190	7,8 / 2,7
Iron	60	7,8
Cast iron	50	7,3
Stainless steel	16	7,8
Soapstone	6,4	2,98

* Registered Trademark Baldassare Agnelli

Each type of material used is a link between the fire and the food.

There are three fundamental characteristics: water resistance, high temperature resistance, and thermal conductivity. This last one is essential: the higher the conductivity of a material (e.g. gold and silver, copper and aluminum), the shorter the time needed to reach the desired temperature, and the better the consistent heat distribution on all surfaces.

Pentole Agnelli products represent the Made in Italy all over the world, a synonym of quality and tradition.

Pentole Agnelli adheres to the European program AFFG (Aluminum for Future Generation) and to CentroAl - Aluminum in the Kitchen, the syndicate gathering the Italian Manufacturers of Professional Cookware.

Pentole Agnelli pursues the fullest customer satisfaction through high quality products, specialized personnel, respect of delivery deadlines and competitive prices. Pentole Agnelli has implemented a Quality Management System in compliance with the requirements of UNI EN ISO 9001:2008, for which it has been certified.
